

Step ②: Buy recycled paper

Why is 'buying recycled' as important as recycling?

Recycling is important but to actually save trees, recycled paper must be bought in place of non-recycled paper.

Is buying paper made from 'Sustainably managed forests' good enough?

No! 'Sustainably managed forests' are planted in place of natural forests which contain a more diverse range of trees and support a greater number of animals. Also, if used paper is not recycled, it creates more waste for landfill.

Which is the most eco-friendly recycled paper to buy?

Local Paper for London recommends  recycled paper because...

- Evolve is the only paper made from waste paper collected from London
- It uses eco-friendly Totally Chlorine Free (TCF) bleaching
- it is made from 100% post consumer waste

Types of EVOLVE™ paper:

EVOLVE™ Office is designed for standard use and is the cheaper of the two.

EVOLVE™ Business is higher quality and available in 80, 90 and 100gsm.
