

Step 1: Choose a recycling collector (North)

Solutions to common problems...

Restricted storage space? You need a collector who will pick up a small number of sacks.

Tight budget? Try to accumulate as much paper as possible for a collection. If you pay per collection, this will mean fewer collections. If you pay per year, the cheapest collectors generally require the largest minimum amounts.

KEY: ■ 1 sack of 'white' paper (approx. size of two stacked up black bags)

N+M = Newspapers and magazines; **CB** = cardboard; **P** = plastic bottles; **TC** = toner cartridges;
FT = Fluorescent tubes; **IT** = IT equipment.

Collector	Minimum amount collected	Cost*			Confidential Shredding?	Other materials collected
		per year	per sack	per collection
